

Market Analysis – Scenarios

EVONIK - How to remain competitive in Europe?

Which strategic investments should the company prioritize to remain competitive in Europe?

Background: EVONIK is currently struggling to adopt AI to enhance their internal processes and are under pressure by cheap competitors on a global scale and high energy costs. They also face disruptions in their supply chain. They are mainly involved in specialty chemicals.

Expected Analysis

- **Political:** EU industrial policy, subsidies, political stability, upcoming regulations
- **Economic:** Energy costs in different member states, inflation, interest rates, global prices
- **Social:** Demographic development, skilled labor availability, sustainability movement
- **Technological:** AI Adoption, Process Automation
- **Environmental:** Renewable Energy, Recycling possibilities
- **Legal:** Emissions regulations, safety legislation (especially in chemical sector)

Documents

<https://www.evonik.com/en/investor-relations/Reporting.html>

There you can find annual reports, financial reports, sustainability reports, and a lot more. You should use most of them and can use RAG to bind them to your pipeline.

Expected Output

Your system should give clear growth opportunities within the chemical sector. It should generate a recommended strategic roadmap with prioritized investment areas. It should note the opportunities and risks associated with each investment area and strategy. A rough cost estimation should also be given.

Volkswagen - Strategic Transformation

How should Volkswagen restructure its global production, workforce, and investment portfolio over the next five to ten years to restore competitiveness while minimizing strategic and societal risks?

Background: Volkswagen is struggling with declining revenues and a sharp decline in its key Chinese market, underused European factories, and global trade regulations. Especially the global shift to EV mobility has met with a stalled EV transition for VW, stemming from software delays and legacy systems.

Expected Analysis

- **Political:** German Automotive policy, tariff scenarios, government subsidies
- **Economic:** Production cost by plant, brand profitability, market demand forecast, labor cost comparisons, currency forecasts
- **Social:** Brand perception in key markets, employee satisfaction, Labor market, Union position
- **Technological:** *Cariad* strategy, patents, battery technology advances, R&D expenditure, software opportunities
- **Environmental:** Battery lifecycle analysis, Co2 emissions per plant, environmental regulations
- **Legal:** Labor agreements, Emissions regulations, GDPR compliance

Expected Output

Give a clear path and concrete actions Volkswagen can and should do to transition its current company regarding the current global challenges in the automotive sector and stabilize revenue. Present different options and give risk assessments given financial, reputational and political challenges. Draft a roadmap, explain each step and decision and their consequences.

BioNTech - From Pandemic Success to Long Term Oncology Leader

How should BioNTech allocate its financial resources, R&D investments, and strategic partnerships over the next decade to become a leading global biotechnology company after the COVID pandemic?

Background: BioNTech was one of the companies who profited during the COVID pandemic the most. Since then, revenue has declined and the market for COVID vaccines has plummeted. The leadership has changed by two founders leaving and high spending in the R&D sector is a financial risk if findings are not fruitful.

Expected Analysis

- **Political:** EU pharmaceutical strategy, international trade deals, public health policies
- **Economic:** R&D expenditure, cash reserve analysis, market growth forecast, competitor financial performance
- **Social:** Demographic projections, healthcare statistics, public perception of mRNA technology
- **Technological:** Patent portfolio, AI strategy, publications, competitor R&D progress
- **Environmental:** Manufacturing emissions, ESG reports (Environmental, Social, Governance)
- **Legal:** Clinical Trial regulations, compliance reports, licenses, regulatory guidance (EMA/FDA)

Expected Output

Return different steps & actions and assess their financial risks and opportunities. Produce multiple possible scenarios by forecasting different market conditions and recommend a strategic roadmap for financial investment in different sectors. Give an overview of competitors' current standings and (dis-)advantages.
